

International Society for Environmental Epidemiology
Minutes for Aug 26, CEE Chapter meeting

The main objective of the Chapter meeting was election of a future Chapter president. The proposal of Hana Slachtova “to extend the geographical covering of presidents” was agreed by the present members. Till now the presidents have recruited from the Czech Republic, Hungary and Poland. The candidate from Romania, Dr. Emilia Niciu, was introduced to the members. As the majority of Chapter members was not present, the election was not realized.

It was agreed to change the system of president election in order that all Chapter members (not only those being present in the Chapter meeting) have the same opportunity to nominate a candidate and to elect a president. All members will be asked by an e-mail whether they are willing to nominate a candidate from their country.

After collection of all nominations (about 20 Sept deadline) the election will be arranged by electronic voting ballots (till mid October).

In Thursday afternoon (Aug 27) the ISEE General Members' Meeting was held. Hana Slachtova presented to the ISEE members very briefly achievements of the CEE Chapter during the last 3 years – overview of the Central and Eastern European Conferences and Chapter meetings, and invited ISEE members to visit Chapter web-site for a more detail information on Chapter activities.
